WOULD YOU LIKE TO SAVE OVER \$600 PER YEAR?

As a SEMCO ENERGY Gas Company customer, you already know the value of natural gas.

If you have an electric water heater in your home, you can save over \$600 per year* by switching to a natural gas water heater. In addition to the savings, natural gas water heaters heat up quicker than comparable electric water heaters.

So if you are tired of a cool shower and want to save some money, take a look at switching to a high-efficiency natural gas water heater.

HANDS OFF FOR SAFETY

Don't Tamper With SEMCO ENERGY Gas Company Equipment

SEMCO ENERGY Gas Company reminds its customers not to attempt to service any natural gas equipment owned by SEMCO – no matter how simple the procedure may seem.

All equipment from the underground piping up to and including your gas meter, as indicated in the diagram, is SEMCO property and is serviced and maintained only by SEMCO Service Technicians or contractors. Customer-owned gas lines and connections between the outlet of the meter and your home, as indicated in the diagram, are the responsibility of the homeowner and should be serviced by a qualified plumber or heating and cooling specialist.

Turning the valve leading to the gas meter on or off, or operating any SEMCO equipment yourself, could result in a serious safety hazard.

If you need to have the gas to your home temporarily turned off for any reason, please contact SEMCO at 1-800-624-2019.

Remember, natural gas is a safe, efficient, and economical fuel when connected and maintained by trained professionals, such as SEMCO Service Technicians.
