

These Rebates Bring the Heat

Heating rebates

In most homes, nothing consumes more energy than heating equipment. Upgrading to a furnace or boiler with a high annual fuel utilization efficiency (AFUE) can have a huge impact on your home's comfort and energy costs.

For example, replacing a standard efficiency furnace with a 98% AFUE furnace can cut your annual energy costs by up to \$190.* Similarly, upgrading to a 92% AFUE boiler could save you up to \$400 a year.*

Even better? You can save hundreds more with rebates from SEMCO's Energy Waste Reduction Program.

Upgrade	Rebate
High-efficiency boiler:	Up to \$1,600
High-efficiency furnace:	Up to \$900
Wi-Fi thermostat:	\$140
Programmable thermostat:	\$20

Start saving.
 Schedule your insulation upgrades with us today, then claim your rebate online at semcoewr.com.

2020 Program Year

*Estimated bill savings are calculated using an average of the energy savings obtained from the Michigan Energy Measures Database (MEMD), and 2020 approved SEMCO ENERGY Gas Company rates. Actual annual savings may differ from the estimated amount. Energy savings vary and are dependent on consumer behavior and in many cases weather.
